

The Eclipse® terminal virtually eliminates the need to use different terminals to process different forms of payment. In addition to credit and debit transactions, this all-in-one terminal also supports the TeleCheck Electronic Check Acceptance® (ECA®) service, which converts paper checks into electronic items at the point-of-sale (POS).

The Challenge:

Most industries — such as retail, restaurant and mail-order/telephone-order businesses — have to support multiple payment types to meet their customers' needs. But these industries sometimes are reluctant to accept checks because they don't have the space for another terminal or don't want to risk accepting unverified checks.

The Solution:

The Eclipse terminal combines advanced authorization and payment technology with access to the industry's largest and most accurate check writing databases. This terminal allows you to replace multiple terminals with one streamlined, easy-to-use device. It includes an advanced check reader and an integrated inkjet printer that voids TeleCheck Electronic Check Acceptance® (ECA®) transactions and endorses paper checks. For credit cards, it has a dual-track magnetic stripe reader. Its large, backlit, touch-screen display makes it easy to use even in low-light work areas. The Eclipse terminal stores up to 300 check and 300 credit transactions for full reporting capabilities.

Here's How It Works:

The Eclipse terminal accepts Personal Identification Number (PIN) and signature debit cards, credit cards (including Visa®, Mastercard®/Diners Club®, Discover® and JCB®) and checks using TeleCheck® ECA® and TeleCheck® Paper Check Warranty and Verification services. The terminal processes transactions through a dial-up connection, and it generates customer receipts with only the last four digits of the card number to help protect your customers from fraud and identity theft.

With its multi-payment capability, integrated inkjet printer and check MICR reader, the Eclipse terminal offers an ideal space-saving, comprehensive POS solution for you.

Industries Served:

- Retailers
- Restaurants
- Mail order/Telephone order

Help Your Business:

- Simplify payment acceptance
- Lower terminal support costs
- Accept payments in less time
- Decrease training time
- Reduce paperwork and improve cash flow
- Eliminate messy stamps
- Automatically void or endorse checks

Help Your Customers:

- Increase the range of payment options
- Protect identify from fraud and theft

Features:

- Unified processing for multiple payment types, including checks
- Compact design
- Integrated inkjet printer and check MICR reader
- Easy-to-learn, easy-to-use touch-screen interface
- Large, back-lit display
- Full reporting capabilities for all payment types
- Easy access to all payment information, including totals and details

A Name You Can Trust:

We've been working with financial institutions and merchants for years, increasing our understanding of what you need to grow your business. We're a leader in payment processing solutions, serving over 4.6 million merchant locations. Put our expertise to work for you. Whatever your need, First Data stands ready to help.
